

# Soumyadip Ghorai

## Professional Goals

MSc Data Science graduate and adventure sports enthusiast with work experience in MNCs and startups, looking forward to learn, assist, collaborate and grow with the best minds in data science and analytics to build and deploy data-driven solutions on a large scale.

## Contact Information

**Mobile:** +91 7872817970

**Email:** [ghorai.soumyadip33@gmail.com](mailto:ghorai.soumyadip33@gmail.com)

**LeetCode :** [/sghorai](https://sghorai)

## Skills

### Languages

Python | SQL | HTML | CSS

### Technical

Machine Learning | Web Scraping | Data Visualization | Web Development | Data Analysis | Natural Language Processing

### Tools

Tableau | VS Code | PyCharm | GitHub | MS Office | Jupyter Notebook | Excel

## Academic History

### Christ University

**Bangalore | 2021 - 2023**

MSc Data Science - 3.54/4

### Indian Institute of Technology Madras

**Madras | 2021 - 2023 (Online)**

BSc Data Science - 7.5/10

### University of Calcutta

**Kolkata | 2018 - 2021**

BSc Statistics - 7.74/10

## Achievements

- 3X Expert @**Kaggle** with 10+ notebooks, 4 data sets & 100+ upvotes
- 3star @**codechef** with 100+ problems, 250+ problems solved on **leetcode**.

## Other Activities

- Google Developers student club **Machine Learning Lead**.
- Represented my college in multiple **state-level athletic meets**.
- **Cultural head** of the department and hosted 2 departmental events.
- Worked as a **freelancer** for various small startups and individuals.

## Work Experience

### Tweek Labs

Data Analyst Intern | Bangalore [\[certificate\]](#)

MAR 2022 - AUG 2022

- Implemented methods like **moving avg**, and **selective scaling** to remove fluctuations in sensor data to get accurate results.
- Set up a separate notebook of **interactive charts** to check for anomalies in various parameters of athletes using plotly.
- **Implemented new features** like max hip rotation velocity, and max shoulder speed to satisfy customer demand.
- Developed **aggregated scoring** methods to rank players according to their stats to help organizations create leaderboards.
- Applied **KNN** to predict ground contact with an average accuracy of **11ms** to get leg parameters more accurately.
- Set up the pipeline to store data in google Sheets using **Google API**, and made an interactive dashboard using **Meta Base** to track **KPIs**.

**Skills:** Python, Meta Base, Google Sheets, Google API, PyCharm, VS Code, GitHub

### Ericsson

Summer Intern | Kolkata [\[certificate\]](#)

SEP 2021 - OCT 2021

- **Root Cause Analysis project:** Predict the root cause and recommend possible resolutions from the error messages from ENM upgradation logs that might reduce the overall processing time by **up to 50%**.
- Wrote a **generalized Python parser** to parse all XML log files and create a clean JSON file to upload on elastic search.

**Skills:** Python, VS Code, MS Office

## Projects

**Net worth Predictor :** [\[GitHub\]](#) [\[App Link\]](#)

AUG 2022 - SEP 2022

**Flask-based** data-driven alternative of FB games to predict your potential future net worth in millions using **machine learning**.

- Scraped the data of HNIs using **Beautiful Soup** consisting of people from **100+ categories** and **130+ countries**.
- Preprocessed the raw data, performed **EDA** to understand the data, and did **feature engineering** and **feature scaling**.
- Used **Regularization, KNN & Random Forest** models to predict net worth based on available features with an **MAE of 1.06**.
- Created frontend using **HTML, CSS, Bootstrap**, and **jinja code** and in the backend used flask and deployed using **Heroku**.

**Tech:** Machine learning, python, Flask, jinja code, HTML, CSS, Bootstrap, VS Code, git, Heroku, Google Analytics

**Personal Finance :** [\[GitHub\]](#) [\[App Link\]](#)

FEB 2022 - MAR 2022

- Collected data on a daily basis of my expenses in a **spreadsheet** and created an interactive **Streamlit** web app to keep track of my expenses.
- Uploaded on GitHub and deployed on Heroku and the project got **featured** on the Streamlit **community forum**.
- Basic features include **Pie charts, bar graphs, spending trends, treemaps**, and **Q&A** to help keep my avg monthly expenses within **5000/-**.

**Tech:** Python, streamlit, plotly, Heroku, HTML, CSS, markdown, VS Code, git

**Customer churn :** [\[GitHub\]](#) [\[App Link\]](#)

OCT 2022 - NOV 2022

- Used **feature engineering & feature selection** to get the **6 best** features.
- Used a **Stacked classifier** model combining **SVC, Random Forest**, and **Gradient Boosting** to predict churn using 6 features with **76%** accuracy.
- Created frontend using **HTML, CSS**, and **Bootstrap**, in the backend used **flask** and deployed using **Heroku**.

**Tech:** ML, python, Flask, HTML, CSS, Bootstrap, VS Code, GitHub, Heroku
